

The Henry Files

These Henry Files consist of images and .PDF files that you can use with the “Paint Your Pet By Numbers” E-Book. You can duplicate them in any way you want but read the book to see what you cannot do. If you haven’t bought the “Paint Your Pet” package, then you can use these files. If you have bought the package, then you can use these to practice with before you move onto your own painting.

These images could be inkjet/deskjet printed or photocopied onto ordinary paper and thin cardstock, acrylic paper, and canvas paper and canvas sheet. Not all printers and photocopiers might be able to deal with the thickness of these papers, but most should. You should be able to use a laser printer as well but **DO NOT** put canvas sheet through a laser printer.

Read the name of the files to tell you what they consist of.

Henry Original, Henry Modified.

The original image of Henry, and the modified image of Henry with the colour cast removed to give a purer white.

Henry 8 Colours Canvas, Henry 12 Colours Canvas, Henry 24 Colours Canvas.

These are PBN canvases of Henry that have been converted to 8 colours, 12 colours and 24 colours Paint By Numbers line images respectively.
