

## Lauren Elizabeth Abstract Colour Scheme

Lauren Elizabeth's speciality is not just pet portraits, but colour mixing and colour application that gives a certain "Zing" to her portraits. What I have done, with her kind permission, is condense some of her work into a straightforward list of realist animal colours, and the abstract colours that can be used as substitutes. You will find most of these colours in the 24 colour paint set.

You really need to go to her web page <https://laurenelizabethanimalart.com/> to learn more.

Colour Type	Animal Example	Realistic Colours	Alternative Colours
